## CAREER OBJECTIVE

I am a **full stack web developer**, with knowledge in **software architecture, interface design**, and **good programming practices**, I am able to create robust and scalable solutions to meet the market demand. Furthermore, I am passionate about technology and always seeking to learn and apply new tools and techniques to improve my performance and offer high-quality solutions to my clients.

## WORK EXPERIENCE

**Full Stack Developer**, 09/2021 – 04/2024

**Sysfacil Desenvolvimento de Sistemas LTDA** – Cachoeirinha, Brazil

Main responsibilities:

- **Web Systems Development:** Full-cycle development of web systems, from conception to implementation, using a variety of technologies and programming languages to create efficient and scalable solutions.
- **Maintenance of Existing Systems:** Continuously maintaining existing web systems by identifying and fixing bugs, implementing performance improvements, and optimizing overall functionality.
- **Continuous Improvement:** Proactively identifying areas for improvement in existing systems, whether through technology updates, code refactoring, or introducing new features to increase efficiency and usability.
- **Cloud Server Management:** Configuration, deployment, and maintenance of cloud servers, ensuring optimal availability and performance of hosted web applications. This may involve using services such as AWS.
- **Team Collaboration:** Collaborating with other developers, designers, and stakeholders to understand business requirements, propose technical solutions, and ensure timely project delivery.

## SKILLS

- |                  |                         |
|------------------|-------------------------|
| ➤ PHP/Laravel    | ➤ Javascript/Typescript |
| ➤ ReactJS/NextJS | ➤ Tailwind CSS          |
| ➤ MySQL          | ➤ Firebird              |
| ➤ Docker         | ➤ AWS                   |

## EDUCATION

**Systems Analysis and Development** - 2020 - 2023

**Estácio de Sá University** - Cachoeirinha, Brazil
